Solving the Agriculture Labor Shortage

Day 1:
1. Before class starts, hang "Infographic 1" posters around the room
2. Introduce project with first slide of Prezi
3. Have students explore the posters and complete first third of worksheet #1
4. When all students have viewed the poster, talk about agriculture labor in your region and some of the facts they learned
5. After discussion, watch the video in the Prezi and fill out the second third on the worksheet #1
6. Have some additional discussion about ideas shared in the videos
7. Have students use a device and complete the last third on worksheet #1. As a teacher, do this too and try to make it a competition with your students to see who can find the most agricultural businesses in town

Day 2:
1. Before class starts, hang "Infographic 2" posters around the room
2. Have students explore the posters and complete first third of worksheet #2
3. When all students have viewed the poster, talk about agriculture labor shortages in your region and across the country
4. After discussion, watch the video in the Prezi and fill out the second third on the worksheet #2
5. Have some additional discussion about ideas shared in the videos
6. Have students use a device and complete the last third on worksheet #2.

Day 3:
1. Before class starts, hang "Infographic 3" posters around the room
2. Have students explore the posters and complete first third of worksheet #3
3. When all students have viewed the poster, talk about agriculture labor solutions you are working on as an ag. Ed program
4. After discussion, watch the video in the Prezi and fill out the second third on the worksheet #3
5. Have some additional discussion about ideas shared in the videos
6. Have students use a device and complete the last third on worksheet #3. Have some conversations with students about their answers and offer suggestions on roles to pursue within agriculture

Day 4-9:
1. Optional extension activity with "career development plan"
